EXPERIENCE

Super Awesome Hyper Dimensional Mega Team - *Programmer*

01/2026 - 10/2026 (contractor)

Terrible Life Expectancy

- Implemented enemy navigation, collision and behavior systems using multithreaded jobs to improve performance.
- Developed gameplay features including bosses, game modes, special weapons, ultimates, traps, save systems and localization.
- Built internal tools to support development and iteration.

Reco Technology - *Lead Programmer*

01/2022 - 01/2026

Baby Shark Sing & Swim Party, Bratz Rhythm & Style, El Coco

- Led programming work across multiple console titles, designing systems for gameplay, game flow and data management.
- Implemented character customization, multiplayer features, UI, combat and power-up systems, and NPC and enemy behavior.
- Implemented localization and worked on asset loading and performance optimization using Unity Addressables.

Mighty Penguin - *Lead Programmer (Personal Project)*

01/2023 - Present

All Things Should Fall

- Lead the programming effort for a 3D action-platformer combining complex movement, platforming and hack-and-slash combat.
- Coordinate programmers across countries and languages while overseeing the technical direction of the project.

Red Moon Workshop - *Netcode and Gameplay Programmer*

10/2021 - 01/2023 (contractor)

Shot One League

- Implemented rollback peer-to-peer networking for a multiplayer game in development.

Good Luck Games - *Gameplay Programmer*

03/2021 - 08/2021 (contractor)

Storybook Braw

- Implemented UI and live-game features, including ranking displays and card hotfix functionality through PlayFab.
- Developed internal tools for card testing and export, improving the development workflow.

EDUCATION

URJC (Universidad Rey Juan Carlos), Madrid, Spain:
Degree in Video Game Design and Development

09/2015 - 12/2020

PERSONAL SUMMARY

Senior gameplay programmer experienced in leading development on commercial titles and building scalable gameplay systems, developer tools, and multiplayer networking. Focused on maintainable architecture, performance optimization, and workflows that help teams iterate faster.

SKILLS

- Programming languages: C#, C++
- Unity Engine
- Gameplay systems and software architecture
- Multithreading and performance optimization
- Rollback and peer-to-peer networking
- Unity editor extensions and developer tooling
- Git and version control
- Technical leadership and team coordination

LANGUAGES

English, Spanish, German

PROJECTS

VFX Timelines Editor Tool:

Published a Unity Asset Store tool for authoring and sequencing VFX timelines.

Unity Message System:

Currently developing a messaging system that decouples game components using listener and command patterns.
